

Coaching Services for EeB-PPP Projects: Innovation Assessment

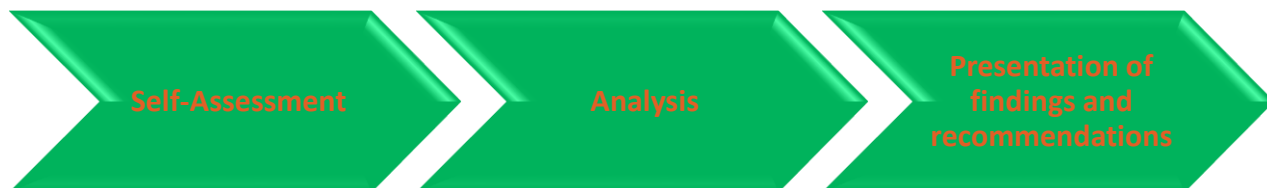

Do you know how innovative you are?

You are the owner of an innovative result or technology developed in a EeB PPP project?
You would like to (commercially) exploit this result or technology?
You have been missing individual and tailored advice on how to optimally do so?
You would like to find out more about your innovation strengths and weaknesses?

Then participate in the EeB-CA² Innovation Assessment! It's a free coaching service!

What is the Innovation Assessment all about? And how does it work?

It's a simple 3-step method:

1. We provide you with a self assessment form

You provide us information of your organization, activities and exploitation plans. This gives us the opportunity to better get to know your organization

2. We analyze your self-assessment based on a proven and awarded method

Based on your answers, we will analyze thoroughly your innovation capacities. You will receive a written report on our results and findings

3. In a video conference we present you our findings and recommendations

They will be discussed with you in detail. We will decide together about your next steps for a successful innovation and exploitation strategy

Is the Innovation Assessment something for you? Then contact the EeB-CA² Project.
